- Git

Projects

Weather Forecasting Application ↗
Enhancing User Experiences with Real-Time Precision
- Designed and developed a real-time weather forecast application with a user-centric interface.
- Integrated advanced meteorological APIs to deliver precise daily and hourly forecasts.

Army Themed Website ↗
Created an informative, engaging web portal for army-related content
- Created a responsive design for easy access on both desktop and mobile devices
- Implemented a clean, professional layout with easy navigation to enhance user experience
- Optimized website performance using CSS Framework Bootstrap for quick loading times and smooth functionality.

To-Do List Application ↗
Task manager built using HTML, CSS, and JavaScript
- Developed an interactive task management web application with features to add and delete tasks using HTML, CSS, and JavaScript.
- Added input validation logic to ensure proper task entries and prevent empty submissions.

CERTIFICATIONS

- Java Course : Softpro India
- Full Stack web development : PW Skills
